

HTTP/JSON Exercise

- Using the node.js HTTP/JSON echo server script on Blackboard
- Create an Android app that will send a HTTP POST to the echo service

```
ejd3@nb-work-02:lectures$ node 10_ExerciseC-nodejs-JSONecho.js
HTTP JSON Echo Server running on port 8124
Handled request: /echo
Echo response: hi there
█
```

A screenshot of an Android application titled "JSONTest". The app's interface includes a text input field containing the URL "http://10.0.2.2:8124/echo", a "Send" button to the right of the field, and a status bar at the top showing "3G" and the time "11:36". Below the input field, the text "Echo response: hi there" is displayed.

5554:Android-4.1.2-16

JSONTest

http://10.0.2.2:8124/echo

Send

Echo response: hi there
