Audio Service Exercise Bounded Version

- Duplicate the previous app created in class <u>but</u> provide the user the ability to play and pause the audio file

- Use the following built-in drawables for the **ImageButton**(s)

  – android.R.drawable.ic_media_play

  – android.R.drawable.ic_media_pause

sidebar: Android provides a mechanism for applications to negotiate the use of the device's audio output using **android.media.AudioManager**
