Shared Preferences Exercise

- Create an app that will lookup stock quotes & save the last stock

- An **EditText** will be used to input a stock ticker

- A **Button** will create an <u>implicit</u> Intent to launch a browser using a Yahoo! Finance HTTP query

  - *http://finance.yahoo.com/q?s=<stock_ticker>*

- A **TextView** will display the last HTTP query

  - Set attribute *android:autoLink="web"*

- Use the File Explorer in the **DDMS** perspective to pull the shared preference XML file over from the emulator
